

PROFESSIONAL FIELD GEOLOGY FROM HORIZON WELL LOGGING

Mud Logging, Geosteering and Geotechnical Services

Today's geologist needs **accurate information, insightful analysis and professional communication** from their service provider. Horizon provides all of this and more under a formal quality assurance program that ensures you get what you need, when you need it, every time.

Mud Logging

Horizon is the premier mud logging firm in the country, providing sophisticated well site geology for over 50 E&P companies. Our sample analysis, interpretation and communication are all designed to ensure you get exactly what you need every day. **For 22 years on over 4,500 wells**, Horizon has been the eyes and ears in the field for geologists needing top-notch service and professional communication of geology and drilling activity.

Geosteering

Horizon is also one of the largest geosteering organizations in the U.S., providing wellbore placement in nearly every major play in the country. Every one of our 30+ geosteering professionals has well site experience and knows what it takes to make a successful horizontal well. Our **National Geosteering Operations Center in Tulsa** is a center of excellence containing the people, technology and resources required to give you the accurate, sophisticated information necessary for a successful horizontal well.

Geotechnical Services

Our newest service offering is outsourced office geotechnical services. With over 150 geologists, we can quickly ramp up to support your geology department in preparing and managing prognoses, downloading and managing well data, creating maps, and performing all the duties of a seasoned geotech. Horizon's **documented business processes and formal quality assurance program** ensure timely, accurate information so your department functions smoothly.

With Horizon, you get the information you need, when you need it, every time.

150+ Geologists

Horizon has over 150 degreed geologists in its workforce. Over 20% have a master's degree or multiple bachelors. With Horizon you get sophisticated, professional communication every time.

National Scope

Horizon works in every major exploration area of the country, including the Marcellus, Mid-Continent, Eagle Ford and Rockies. We follow approximately 100 rigs for over 50 E&P companies.

Innovation

Horizon has advanced technology like 24x7 internet and mobile phone access to real-time well data and geosteering on the iPad. Only Horizon brings you this type of 21st century information.
